25X1

1. A conference of doctors working in the Lessno district was convened in Lessno during the second half of October 1953.
2. The main purpose of the discussions was to impress the doctors with the need for the speediest possible turnover of patients in hospitals.
3. The doctors were also informed that they are held responsible for the activities of feldshers working in their areas. They were told, for instance, that should a patient die through the fault of the feldsher, then the doctor, even if totally unaware of the case, would be held responsible together with the feldsher.
4. The doctors were instructed to organize additional training courses for ancillary personnel in their areas under their own initiative. These courses are to last six weeks, and are to be initiated with the least possible delay.
